

## IN PERSON TRAINING

# Introduction to Implant Design

At this one-day Course , Joshua Jakson will instruct designers of all skill levels on how to design and manufacture everything one needs to execute a single unit or mutli unit bridge implant restorations. Dentists are now about to manufacture their own surgical appliances in order to complete these treatments. This means one appointment dentist-ry with more control and predictability.

Jakson will be guiding you through the modules that are required to produce implant restoration. The goal in coming to this course is to have you leave confident in manufacturing: intraoral scanning for implant treatments, abutments, ti bases and crowns with screw channels

### ***What you will learn:***

- Creating custom abutments / ti-bases,
- Designing a crown with a screw channel,
- Using intraoral flag scans for efficient chairside workflows

#### Course Date

April 17th, 2021 (Buffalo)  
September 17th, 2021 (Las Vegas)
