

## IN PERSON TRAINING

# Digital Removables

At this Two day event, Joshua Jakson, President of Evolve Dentistry will instruct designers on how to use Exocad in order to create removable restorations like dentures and Partials in a hands on laboratory learning environment. Not only will individuals get to have hands-on instruction, but also get expert tips and tricks that turn you into effective designer for the clinical or lab environment.

Jakson will be guiding you through the best ways individuals can create digital dentures using exocad software. The goal in coming to this course is to have you leave confident in creating: denture, partial frameworks, In addition we will be going through workflows for manufacturing, post processing of dentures, and partials.

### ***What you will learn:***
